DETAILED ACTION

1. This action is in response to an application filed on 7/6/01. There are twenty-four claims pending. Claims 1-3 are compound claims. Claim 4 and 5 are is a composition claim. Claims 7-24 are synthesis claims. This is the first action on the merits. The application concerns some piperazine oxazolidone compounds, compositions, and preparations thereof.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 16-24, drawn to compounds where ring C is a piperazine, classified in class 544, subclass 367, among others.
- II. Claims none, drawn to compounds were ring C is a piperidine, classified in class 546, subclass 209, among others.
- III. Claims none, drawn to compounds were ring C is a 1,4-homopiperazine, classified in class 540, subclass 575.
- IV. Claims none, drawn to compounds were ring C is a 3-aza-bicyclo[3.1.0]hexane, classified in class 548, subclass 229, among others.
- V. Claims none, drawn to compounds were ring C is all other ring systems, classified in class 540, subclass 467, among others.

If Applicants' elect group V, then additional restriction will be required.

Claim 3 links Groups I-IV.

Claims 1, 2, and 4-15 link all Groups.

3. The inventions are distinct, each from the other because of the following reasons: the heterocyclic core of the structure given in claim 1 is the ring C. This heterocyclic ring is a mandatory feature and ranges in size from four to ten atoms with multiple possible heteroatoms. These multiple claimed rings are chemically non-equivalent and are not art-recognized as sharing the same biological properties. Inventions I-V have acquired a separate status in the art as shown by their different classification, thus the patent search required for Group I is not co-extensive with that required for Groups II-V. The basic names of these heterocyclic compounds differ, thus the literature search for these various species will be divergent. Because these inventions are distinct for the reasons given above, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if

one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion

6. Please direct any inquiry concerning this communication or earlier communications from the Examiner to Thomas C McKenzie, Ph. D. whose telephone number is (703) 308-9806. The FAX number for before final amendments is (703) 872-9306. The Examiner is available from 8:30 to 5:30, Monday through Friday.
